

Data sheet

KNX PowerSupply DGS 366

(Art. # 5207)

640 mA Power supply with integrated KNX node, diagnosis and logical functions

Photo of the device

Application area

The KNX PowerSupply DGS 366 is a 640 mA bus power supply with high efficiency and a small footprint of only 4 units (72 mm). The device has a bus choke and additionally provides an output for auxiliary power.

The integrated KNX node monitors output current, bus voltage and the temperature in the enclosure. Various logic functions are available for application purpose. The configuration is done with the ETS (version 4.2 or higher). An easy to read OLED display on the front panel enables the user to display the operating parameters locally on the device.

Technical Specification

Electrical safety

- Protection (acc. EN 60529): IP 20

CE marking according to

- Low voltage directive 2014 / 35 / EU
- EMC directive 2014 / 30 / EU
- RoHS directive 2011 / 65 / EU
- EN 50491-3: 2009, EN 50491-5-1: 2010
EN 50491-5-2: 2010, EN 50491-5-3: 2010
- EN 61000-6-2: 2005
EN 61000-6-3: 2007 + A1: 2011
- EN 60950-1: 2005 + A1: 2009 + A2: 2013
- EN 50581: 2012

Environmental requirements

- Ambient temp. operating: - 5 ... + 45 °C
- Ambient temp. non-op.: - 25 ... + 70 °C
- Rel. humidity (non-condensing): 5 % ... 93 %

Mechanical data

- Housing: plastic (PC)
- DIN rail mounted device, width: 4 units (72 mm)
- Weight: approx. 260 g

Controls and indicators

- OLED display with 4 buttons
- KNX programming LED (RD)

Power Supply

- Input supply 230 V AC, 50 Hz
- Power loss (no operation): ca. 1.2 W
- Power consumption (max., overload): 48 W
- Efficiency at rated load: ca. 85 % (including bus choke)

Output

- KNX rated voltage 30 V DC, SELV
- Auxiliary rated voltage 30 V DC, SELV
- Rated current 640 mA (both outputs in total)

Connectors

- Pluggable screw connector for 230 V AC
- Bus connector for KNX output (RD / BK)
- Connector for auxiliary power output (YE / WH)

Installation Instructions

- The device may be used for permanent interior installations in dry locations, within distribution boards or small casings with DIN rail.

**WARNING**

- The device may be built into distribution boards (230/400V).
- The device must be mounted and commissioned by an authorized electrician.
- The prevailing safety rules must be heeded.
- The device must not be opened.
- For planning and construction of electric installations, the relevant guidelines, regulations and standards of the respective country are to be considered.
